

Jason Nguyen

Seattle, Washington – (206) 330-9954 – jhnwoo.dev@gmail.com – [linkedin.com/in/jhnwoo](https://www.linkedin.com/in/jhnwoo) – gitlab.com/jhnwoo-dev

Aspiring front-end developer utilizing my private banking and psychology background. My experiences have led me to become resourceful, self-driven, and calculated. As a life-long learner, I decided to leave banking to pursue my passion in technology to allow me to create meaningful and intuitive experiences on the web. I recently earned my certificate in Full Stack Development from the University of Washington/EdX and developed skills in JavaScript, CSS, React, and responsive web design - I am excited to leverage my skills in the future as an impactful member of a quality-driven team to build the next meaningful experience.

Technical Skills

Programming Languages – JavaScript ES6+, HTML5, CSS

Front-End – DOM manipulation, React, jQuery, Node.js, Express.js

Back-End – SQL, MongoDB

System Design – DOM manipulation, React

Education

University of Washington/EdX Bootcamp | Full-Stack Developer Certificate 2023

- **Modules:** HTML, CSS, and Git, Advanced CSS, JavaScript, Web APIs, Third-Party and Server-Side APIs, Node.js, Express.js, SQL, NoSQL, Object-Relational Mapping (ORM), Model-View-Controller (MVC), React, MERN applications, State (also Object-Oriented Programming, Computer Science for JavaScript, PWAs)

University of Washington | BA Psychology 2021

Application Development Experience

Eatsy – Design Lead/Front/Back-End Flex Developer – [Eatsy Repo](#) – React/MongoDB/JavaScript 2023

Awards: Best Functionality, Best Project (Peer Voted)

A social media platform application for home cooks, foodies, and chefs to connect and share their recipes.

- Led design direction with emphasis on color theory and user-friendly interfacing via extensive wireframing
- Utilized a multi-repo setup - React front-end with a separate MongoDB back-end - to reduce troubleshooting issues
- Struggled with balancing roles of team - rescaled tasks/roles to reach project scope with extra time for further refining

World of Wordcraft – Front/Back-End Flex Developer – [Wordcraft Repo](#) – MySQL/JavaScript/Node.js/Handlebars.js 2023

A text-based adventure game that utilizes user inputs to create spells with unique rhyming multipliers.

- Developed models for SQL back-end and led front-end design for user sign in/up and home page via Handlebars.js
- Developed well-structured ERD with associations that would allow for further development post project timeline
- Scaled functionality of project due to the size and scale of initial concept - much larger project for allotted time

Hero Clash – Project Manager/Front-End Developer – [Hero Clash Repo](#) – HTML/CSS/JavaScript 2022

A comparison application that allows new prospective DnD players to visualize class differences.

- Managed team roles and responsibilities via Kanban Board and led daily stand-up meetings to keep team updated
- Managed GitHub repo and troubleshooted merge conflicts that occurred throughout project week

Pre-Developer Professional Experience

Seattle Bank – Client Support Associate January 2022 - December 2022

- Coordinated with a team that generated \$100 million in CD assets in 3 months via CD Campaigning
- Collaborated with the multiple departments during the CD campaign to refine methods of client retention through volatile interest rate competition.
- Assisted VP and assistant manager in onboarding and training of 6 new hires during the peak of CD campaign

ATI Physical Therapy – Operation Support Specialist September 2021- November 2021

- Restructured patient intake and therapist scheduling which increased patient retention from 60% to upwards of 85%
- Increased retention rate and payment management brought the clinic from bottom performing to top three in the district
